The Adventure
Of Paper,
**FROM PULP
TO PAPER**

THE JOURNEY OF
A WATER DROP

Number 4 July - August - September 2019

Pre-School

Hello, my friend!

The most important tools for imparting information are books. Thanks to books, we can easily learn about events that occurred even thousands of years ago. Since they are so important, their main material, the paper, is also very important. We have studied paper in this issue. We have written about the stages of paper manufacturing from tree to paper, in other words "The Adventure of Paper". You can also find a graph of "The Adventure of Paper" in the magazine describing how paper is made.

*Every time you turn a page of this magazine, you will find yourself in a different adventure.
Have a pleasant reading!*

PLANTS WE HEAR ABOUT DAILY BUT HAVE NEVER SEEN BEFORE

İsmail Bilgiç

There are many plants that we hear about every day, but never seen before. We even consume them daily. That is because they are nutrients used in chocolate, biscuits and pastries. However, I'm sure you've never seen them before.

The cocoa is the plant, which produces the raw material of chocolate. The cocoa seeds contained in this plant are ground after drying. This powder is the main ingredient of chocolate. Cocoa is a very bitter plant. It is sweetened after boiling.

What is the top view of the shape below?

PLUMS ROLLING FROM THE BASKET

Written by: Fatih Benzer

Illustrated by: Burak Batuhan Kaya

I benefit a lot from my grandfather's library. I learn new things every day from the books and relate them to my teacher and friends on every occasion. This makes me the best participant in the class and enables me to prepare the best homework projects, which cause them to admire me.

AN AMAZING TRIP ACROSS SOUTH AFRICA

Hello friends, nice to be in your company once again. I am sure you all are having lots of fun at school, with lots of fun activities, learning and playing.

I am well too. I have been resting after my last travel to Istanbul, Turkey. I really needed to rest as I wanted to make sure my body and wings were strong to carry me across Africa. Yes my dear friends, I was heading for beautiful country at the tip of Africa, known as South Africa. I wanted to fly to South Africa for a long time, especially after hearing from my other stork friends that it is one of the most beautiful countries in Africa and many of my animal friends live there. There is one very good friend called the blue crane. He has become very famous, and famous for his powerful rattling croak 'KRAAARRK', which can be heard from far away.

In this section, we want you to write a story about the Photography below. What is the photograph telling you? What comes to your mind? Can you make up a story about it? First think about it well then take your pen and write it down!

- As soon as your story is ready, email it to: **bilgi@camlicacocukdergisi.com** by the 10th of the month.
- That's it! Remember, your story should not be more than 150 words.

Do not forget that we will print the stories we choose in our next issue.
